

Organic Rooftop Garden

We honor Mother Nature and serve her fresh bounty daily.

Our *Virginia Green* award was only the beginning; we continue to serve our guests and the environment in an eco-friendly manner. One benefit of being here in the Shenandoah Valley is access to nearby organic farms and that allows us to serve fresh, farm-to-table food . We believe in basics, so we start with select food grown on local farms that are personally inspected by our Director of Food and Beverage.

Our herbs are equally delicious and, of course, organic. On Earth Day in April, 2009 we planted our hotel rooftop garden for indigenous Virginia flowers, vegetables and herbs. We harvest and utilize our rain water and even capture the condensation from our air conditioning unit, almost 20 gallons a day. Our approach is to enjoy beauty, eat well and tread lightly on this good earth.
